### **DETAILED ACTION**

1. Claims 1-29, 31-34, 36-44 have been pending and are examined.

### **Response to Amendment**

Applicant's arguments filed 9/19/2005 regarding the rejection of the claims 1-11, 13-29, 31-34, 36-44 under 35 U.S.C. 103() have been fully considered and are persuasive. Applicant's arguments relating to the rejection of claim 12 are rendered moot in view of a new ground(s) of rejection presented in this office action.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 12 is rejected under 35 U.S.C. 102(e) as being unpatentable by US 2005/0210275 to Homing et al.

As per claim 12, Homing et al teach a method composing; generating a checksum on bytes of a digital good based on modifications made by the digital good rather than on reading the bytes (see page 38, paragraphs 0557-00560, where code' self-modification techniques by

generating checksum (i.e. calculating MAC value) in SDP (a self defense program) is expressly disclosed. See also Figure 32 and associated text).

***Allowable Subject Matter***

3. Claims 13-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1-11, 16-29, 31-34, 36-44 are allowed over prior art of record.

**Conclusion**

4. Prior arts made of record, not relied upon:

US 5, 748,741 to Johnson et al.

US 6, 801,999 to Venkatesan et al.

US 6,779,114 to Chow et al.

US 6,668,325 to Collberg et al.

US 5,123,045 to Ostrovsky et al.
